K. Uchida and K. Aida: Taxonomic significance of cell-wall acyl type in *Corynebacterium-Mycobacterium-Nocardia* group by a glycolate test 169
A. Ueki and T. Suto: Cellular fatty acid composition of sulfate-reducing bacteria 185
R. Patel, C. T. Hou, and A. Felix: Purification and properties of cytochrome *c* from *Methylomonas methanica* 197

Short Communications

V. H. Mills and C. I. Randles: Manganese oxidation in *Sphaerotilus discophorus* particles 205
T. Hasegawa, M. P. Lechevalier, and H. A. Lechevalier: Phospholipid composition of motile actinomycetes 209

Number 4, August 1979

S. Okada, Y. Suzuki, and M. Kozaki: A new heterofermentative *Lactobacillus* species with *meso*-diaminopimelic acid in peptidoglycan, *Lactobacillus vaccinostercus* Kozaki and Okada sp. nov. 215
F. Kawamura, H. Saito, Y. Ikeda, and J. Ito: Viable deletion mutants of *Bacillus subtilis* phage ρ 11 223
T. Iijima, H. Saito, and Y. Ikeda: Phenotypic curing of sporulation-negative mutations in *Bacillus subtilis* glutamate 237
H. Saruyama, A. Oshima, and S. Sasaki: Changes of viability and protein-synthesizing activity in psychrotrophic and mesophilic bacteria by chilling at 0° 247
T. Hayakawa, T. Tanaka, K. Sakaguchi, N. Ōtake, and H. Yonehara: A linear plasmid-like DNA in *Streptomyces* sp. producing lankacidin group antibiotics 255
I. Nioh: Nitrogen fixation and a nitrogen-fixing bacterium from the roots of *Eragrostis ferruginea* 261

Short Communication

J. Antheunisse: Observations on the decomposition of coconut fibres 273

Number 5, October 1979

K. Kouno, T. Kumamoto, H. Iwaki, and K. Iwai: Identification of quinolinic acid-utilizing bacteria 279
S. Goto: Two new yeast species belonging to the genus *Candida* 293
H. Okuyama, N. Fukunaga, and S. Sasaki: Effect of temperature on the activities of the electron transport systems and the coupled phosphorylation in mesophilic, psychrotrophic and psychrophilic bacteria 299
Y. Maruyama, K. Onodera, H. Seto, and S. Funahashi: Surface localization of enzymes in mycelia and microconidia of *Fusarium oxysporum* 307
J. Takagi and H. Hirokawa: Comparative studies on *Bacillus* phages containing relatively small DNA. I. Sensitivity to anti-phage sera and inhibitors of DNA synthesis 315
K. D. Munkres: Biotin deficiency and the sparing effect of nordihydroguaiaretic acid in *Neurospora crassa* 323
M. Okunishi, K. Yamada, and K. Komagata: Electrophoretic comparison of enzymes from basidiomycetes in different stages of development 329

Short Communications

K. ONODERA and Y. MARUYAMA: Purification and crystallization of invertases from *Fusarium oxysporum* 335

T. K. CHATTERJEE, A. BASAK, C. D. GUPTA, A. K. BARUA, and K. SEN: Microbiological oxidation of testosterone by *Gibberella fujikuroi* (NCIM) 339

Number 6, December 1979

T. URAKAMI and K. KOMAGATA: Cellular fatty acid composition and coenzyme Q system in Gram-negative methanol-utilizing bacteria 343

Y. MARUYAMA and K. ONODERA: Production and some properties of invertase isozymes of *Fusarium oxysporum* 361

S. GHOSH and G. C. CHATTERJEE: Superoxicide dismutase activity in *Vibrio el tor* in relation to oxygen toxicity and bactericidal action of nitrofurantoin 367

T. NAKASE, K. KOMAGATA, and Y. FUKAZAWA: A comparative taxonomic study on two forms of *Candida parapsilosis* (Ashford) Langeron et Talice 375

N. MAKIGUCHI, M. ARITA, and Y. ASAI: Isolation, identification, and several characteristics of luminous bacteria 387

Short Communications

A. TAKENAKA, K. OISHI and K. AIDA: Sugar specificity of the hemagglutinins produced by soil bacteria 397

E. KAIRIYAMA, Y. NISHIMURA, and H. IIZUKA: Radioresistance of an *Acinetobacter* species 401
